

SOLID FLO/FL SITUATIONS

Digital 1000, 2000 system panels showing solid "FL"
Digital 3000 system panels showing solid "FLO"

System is detecting a closed flow switch with the pump not running. Switch is remaining closed after the pump shuts off. ***Do not replace the circuit board yet!***

Unplug the flow switch from the circuit board. Does the "Solid FLO" Message disappear?

NO

Turn the power off and on. Does the solid FL / FLO message disappear?

NO

Replace the circuit board

YES

Remove flow switch and bend the metal strip away from the post. Check with ohmmeter to confirm switch is open. If meter shows continuity with switch visibly open, replace the switch and plug back onto the board.
